

# Is anyone there?

BIG QUESTION

Who made everything?

Look up at the sky at night. You can see stars far, far away.

Scientists found out that the universe had a beginning. It has not always been here!

The universe is also set up just right. If its “dials” were turned even a little, there would be no stars and no people.

And inside every living thing are tiny cells with a secret code called DNA. It is like a set of instructions.

The Bible tells us who made it all: God.

 Set the dial!

God set the universe just right. Draw the needle so it points to the thin green part.
