

BIG QUESTION

Is the universe fine-tuned for life?

The universe runs on a few special numbers. They work like dials.

One dial is how hard gravity pulls. If it pulled much harder, the universe would be small and would not last.

Turn almost any dial a little, and there would be no stars and no people.

Who set the dials just right? God did!

Set the dial!

God set the universe just right. Draw the needle so it points to the thin green part.

Memory verse

“In the beginning God created the heavens and the earth.”

Genesis 1:1

Fill it in: “In the _____ God created the heavens and the earth.” Genesis 1:1

I can say it! ☆ ☆ ☆ Color a star each time you say it.

Talk about it

1. Which dial do you think is the most amazing?
2. Why do you think God set everything just right for you?
3. How can you say thank you to God tonight?
