

BIG QUESTION

Can life come from non-life?

Every living thing comes from another living thing. But the very first cell had no parent.

Even the smallest cell needs DNA, proteins, and a skin, all at the same time.

Scientists have tried hard. Nobody knows how to build a living cell from scratch.

The Bible tells us where life comes from: God!

Draw it!

Draw a living thing that God made.

God made _____

Memory verse

“In the beginning God created the heavens and the earth.”

Genesis 1:1

Fill it in: “In the _____ God created the heavens and the _____.” Genesis 1:1

I can say it! ☆ ☆ ☆ Color a star each time you say it.

Talk about it

1. What living thing God made do you like best?
2. Why does a cell need all its parts at once?
3. How can you say thank you to God for your life?
