

**BIG QUESTION****Could evolution build the cell's machines?**

Inside a tiny germ, too small to see, there is a motor. It spins a tail like a propeller.

A mousetrap needs all its parts. Take away the hammer, and it catches no mice at all.

The germ's motor has about twenty kinds of parts. Take away a main part, and the germ can't swim.

Who made such wonderful things? The Bible says God made all things, and he made you!

**Every part counts**

Draw a line from each one to what happens.

1 A trap with no hammer

A The drug stays out.

2 A motor with a main part missing

B Wonderfully made by God!

3 A germ with broken doors

C It catches no mice.

4 You!

D The germ can't swim.

Memory verse

"In the beginning God created the heavens and the earth."

Genesis 1:1

Fill it in: "In the _____ God created the _____ and the _____ ." Genesis 1:1

I can say it! ☆ ☆ ☆ Color a star each time you say it.

Talk about it

1. What part of your body is the most amazing?
2. Why does a mousetrap need all its parts?
3. God made you. How can you thank him today?
